Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kirby ('507).

As to claim 1, Kirby discloses a ventilated mask comprising: an upper visor detachably affixed (via elongate means #88) to a lower mask portion, upper visor forming a visor frame (E) supporting a pair of laterally spaced lens openings (G) separated by a bridge member, said bridge member forming at least one ventilation aperture (col.8, lines 5-12) for providing fluid communication between the space behind the visor and the outside atmosphere; a pair of clear lens elements, one said clear lens element supported within each said lens opening, said lower frame member further forming connection means to connect physically with a lower mask portion (col.7, lines 57-66), and said lower mask portion.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3743

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kirby ('507) in view of Bowers ('877).

The difference between Kirby and claim 2 is said upper visor forms a half-helmet formed of rigid material.

Bowers, in a ventilated mask, teaches an upper visor forming a half-helmet formed of rigid material for the purpose of supporting a compressed air pipe that supplies air into the helmet for forcing any dust out (page 2, col.1, lines 10-25).

It would have been obvious to modify the upper visor of Kirby to include a half-helmet formed of rigid material because it would have provided a means for forcing any dust out of the helmet as taught by Bowers.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kirby ('507).

As to claim 3, while Kirby is silent as to the particular type of lens material, it is submitted that since the mask of Kirby is intended to be used in a rough outdoor environment, it would have been obvious to modify the particular lens material to be high impact because it would have protected the lenses from easily breaking or cracking as an obvious matter of design choice with no new or unobvious results accruing.

Allowable Subject Matter

6. Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Art Unit: 3743

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The balance of the art is cited to show relevant ventilated masks.
